

Established over 20 years ago as Australia's first specialist fire safety engineering consultancy, Stephen Grubits & Associates (SGA) is highly regarded, with multiple award-winning projects across a variety of sectors operating in Australia and Asia. We are passionate about solving Fire Engineering-related problems and innovative design.

The culture of our organization is supportive and collaborative with flexible working arrangements. We work as a team and enjoy social interaction and team building events through the year.

SGA has experienced a period of growth with many large infrastructure projects that demand a high level of expertise in engaging with design teams, determining scope, objectives and constraints, technical review of design documentation and the preparation and assessment of fire safety designs, in consultation with a broad range of stakeholders.

Stephen Grubits & Associates are currently recruiting for the position of:

- **Senior Fire Safety Engineer**

This position is suited to a C10-Accredited Senior Fire Safety Engineer who prefers to be hands-on with delivering projects, and with a strong technical foundation. You be reporting to and have support from the Technical Director and Team Leader, however, this position will offer complete freedom and autonomy to manage your projects. As an experienced consultant, you will be well-versed in client relationship management, delivering projects on time and on budget in an independent manner.

The right candidate will have the opportunity to work on a variety of medium and large scale projects, including retail and commercial projects. SGA has a strong pipeline of industrial and infrastructure fire engineering work, so your projects will include a variety of airports, train stations, tunnels and multi-storey complexes.

Our company offers a range of specialist value-adding consulting services tailored to address issues of varying size and complexity. The company strategy is to combine leading-edge capability in the latest fire science and modelling tools with key expertise in regulatory issues to deliver the best advice across a range of design and construction issues of buildings and infrastructure.

Role and Responsibilities – Senior Fire Safety Engineer

- Mentoring, staff development and review of other engineers work
- Stakeholder engagement and liaison
- Development of fire engineering solutions and reports commensurate with current industry practice, relevant guidelines and the Building Code of Australia, AS 4825 and/or the International Fire Engineering Guidelines. This will involve analyzing designs in terms of potential fire growth, means of egress, structural fire resistance and smoke control by various methods, including hand calculations and computer modelling software.
- Undertaking inspections of existing buildings and completed works.
- Project management including tender evaluation, preparation, design, liaising with approval authorities, and resource management/allocation
- Develop and maintain client relationships

- Undertaking Continual Professional Development in accordance with those requirements set down by the Institution of Engineers Australia.

Minimum Requirements – Senior Fire Safety Engineer

- Postgraduate qualification in Fire Engineering / Science
- 4-6 years consulting experience working on performance-based design.
- Advanced written and verbal communication skills and ability to work well in a team, including giving and receiving technical feedback
- You are independent, systematic, and ethical in your approach.
- Strong interest in working on large-scale building and infrastructure projects
- Skilled in the use of fire and evacuation modelling, including forming acceptance criteria, deriving fire scenarios, assessing tenability or system performance and coaching more junior staff in these aspects
- Knowledgeable in best practices of risk assessment
- Experienced in the specification of fire safety systems
- Willingness to be part of a small team and take responsibility for actions
- Good relationship and client/stakeholder management skills

Work Eligibility:

- Permitted to work permanently with no restriction on hours (e.g. citizen, permanent resident) (Required)
